ENHANCING VALUE WITH RADIO FREQUENCY

## CORE CONSENSUS OF BLOCK CHAIN **VALUE**

# THE CONSENSUS VALUE OF BITCOIN

The value of Bitcoin comes from the pioneers in blockchain. Over the course of 10 years, it has experienced countless recoveries and continued appreciation of BTC prices. Players belief in virtual currency comes from the continuous and stable value trend. .

**“BENEFIT STABLE VALUE-ADDED”**  
Is the core of the blockchain values consensus.

# CONSENSUS CONNECTOR FOR EX-EVC

## THREE ELEMENTS OF VALUE CONSENSU

---

Consensus Cognitive Scope

Consensus Cognitive Time

Consensus Cognitive Value

## EX-Balance the Energy Source of Ecological Development

The value of EVC needs more ecological supporters to participate in EX as a catalyst for the ecological development of EVC, which will not produce bubbles but can balance and affect the ecology. The user's RF needs to consume USDT and EX, and the acquisition of EX needs all supporters to share the value of EVC. Drive the market with interests and control consensus with value

ECOLOGICAL ENERGY SOURCE OF EX-EVC

# EX

LOOKING FOR THE CONSENSUS  
POWER OF THE BLOCK WORLD

SHARING EVC FOR ENERGY  
EXCAVATING THE INFINITE WEALTH OF EVC WORLD

## ECOSYSTEM OF EVC RF AND ENERGY

# RF vs ENERGY

ECOLOGICAL PARTICIPANTS

**LINK** CONSENSUS WITH ENERGY

**ENHANCING** VALUE WITH RADIO FREQUENCY

## RF-EVC ecological MARKET DRIVE MECHANISM

EX is the energy required for EVC ecological radio frequency, users need to consume USDT and EX when participating in radio frequency, and the only channel for EX to obtain is to register and share EVC APP gift. Users in order to get EX will vigorously promote EVC, EVC will have more users in the future.

All EVC users can use EVC APP, USDT and EX for RF. Through radio frequency, users can get a large number of EVC at the same price, and EVC obtained through radio frequency every day will get EVC at a lower price than the trading market. Through the difference of RF price, it will promote the rapid development of EVC market.

## EX ENERGY ACQUISITION MECHANISM

Registration Award: 300EX Level  
1 Share Registration: 100EX Level  
2 Share Registration: 50EX Level  
3 Share Registration: 30EX

- V1: Push 10 people directly, the total energy of the team is  $\geq 20000$  EX, and the total energy of the team is rewarded for 2 days;
- V2: Push 3 V1s directly, sum of team energy  $\geq 80000$  EX, reward sum of team energy for 4 days;
- V3: Push 3 V2s directly, team energy total  $\geq 200000$  EX, reward team energy total 8 days. .

Note: (EX is the EVC eco-rights and RF qualification mark, has no value, will not inject foam into the EVC ecosystem, but also can stimulate the development of EVC ecological node. USDT only, no EX, is unable to participate in EVC RF operation. Only when the user has both energy and USDT can RF in APP. )

EVLET VALUE CHAIN

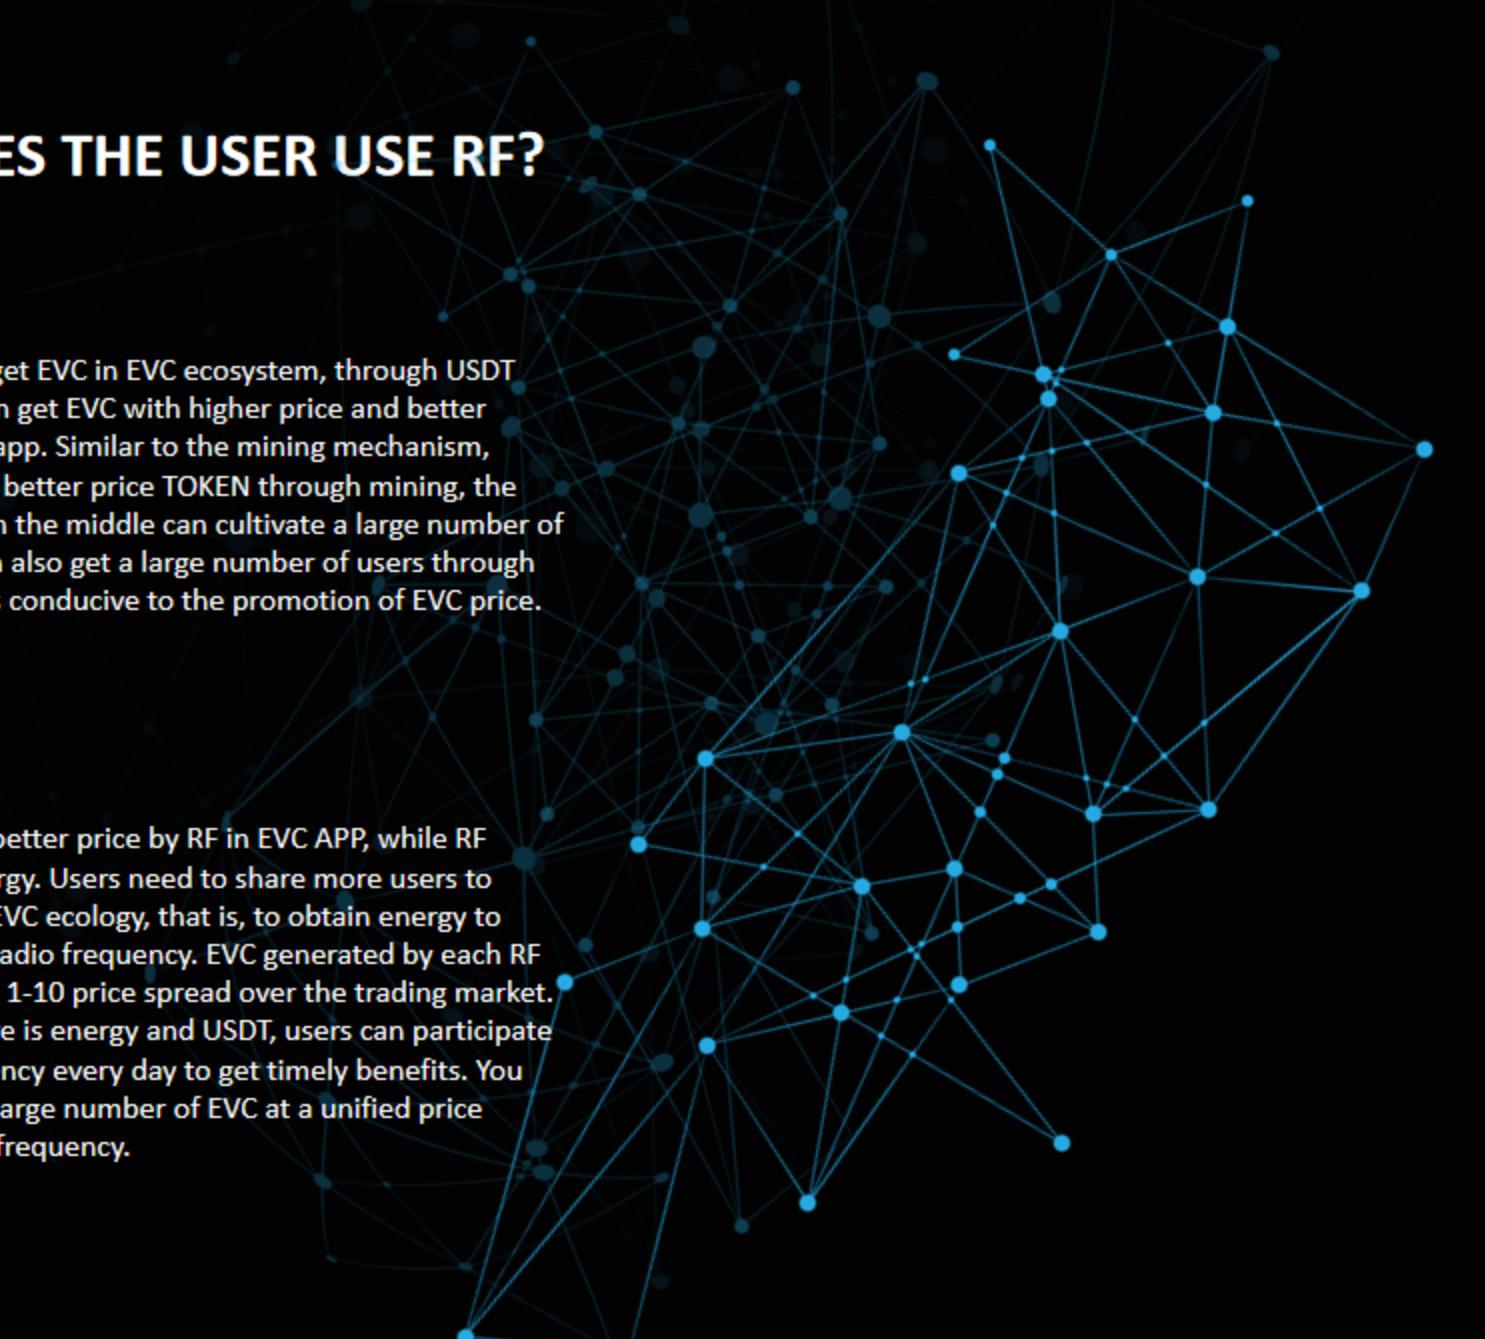

## WHAT IS RF AND WHY DOES THE USER USE RF?

### WHAT IS RADIO FREQUENCY

RF is a way to get EVC in EVC ecosystem, through USDT and EX, you can get EVC with higher price and better quality in EVC app. Similar to the mining mechanism, miners can get better price TOKEN through mining, the profit margin in the middle can cultivate a large number of nodes, EVC can also get a large number of users through this way, and is conducive to the promotion of EVC price.

### WHY RADIO FREQUENCY

Users can get better price by RF in EVC APP, while RF consumes energy. Users need to share more users to participate in EVC ecology, that is, to obtain energy to participate in radio frequency. EVC generated by each RF will generate a 1-10 price spread over the trading market. As long as there is energy and USDT, users can participate in radio frequency every day to get timely benefits. You can also get a large number of EVC at a unified price through radio frequency.

EVC TOTAL RF **DECREASING DAILY**

THE TOTAL AMOUNT OF EVC RADIO FREQUENCY IS 10 MILLION  
AND THE TOTAL AMOUNT OF RADIO FREQUENCY IS DECREASED  
BY 1 PER DAY UNTIL THE RADIO FREQUENCY REACHES 1 BILLION.

**THE EXTREME DEFLATION MODEL OF EVC**

## EVC and RF Game

ELLET VALUE CHAIN

EVC EACH DAY TO PARTICIPATE IN LESS RF USERS  
EACH USER WILL GET A LOWER PRICE OF EVC.

### INVERSE GAME MECHANISM

It will attract a large number of users to obtain  
EVC wealth through radio frequency daily game.

# THE VALUE-ADDED LOGIC OF EVC RF

## 01 **EVC radio frequency deflation**

The total amount of EVC RF decreases by 1 per day, and with the decrease of the total amount of EVC RF, the price of EVC obtained by users will continue to rise.

## 02 **Inverse Game Mechanism**

EVC less people per day RF, the same USDT RF will get more EVC, reverse game mechanism, will attract more users to participate in EVC RF.

## 03 **Value-driven**

The price of EVC obtained through EVC radio frequency will be lower than 1-10 compared with the trading market, which makes EVC radio frequency users have value space. Value driven will harvest more users to participate in RF.

## 04

### **Consensus Connector for EX-EVC**

EVC users need to participate in RF, USDT and EX. The acquisition of EX requires more supporters, EX will not increase the bubble of EVC ecology, but will increase the consensus of EVC and connect more users.
